REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The elected Group I, Claims 1-8, are directed to an organometallic compound obtained by reacting a N-substituted and α -H containing pyrrole or its derivatives and specified Lewis acid of formula MtR^1_3 wherein Mt belonging to Group 13 such as B and R is a halogen or a halogenated aryl group.

Prior art such as Resconi et al. (6,608,224) are directed to an organometallic compound obtained by reacting a pyrrole or its derivatives without being N-substituted and specified Lewis acid of MtR^1_3 wherein Mt belonging to Group 13 such as B and R is a halogen or a halogenated aryl group. However, Resconi does not teach or reasonably suggest its pyrrole-containing compound to be the N-substituted and α -H containing pyrrole-containing compound of the instant claims. The search results indicated that the organometallic compound is novel, therefore, the rest of the pending claims 9-20, directed to a salt obtained from the metal compound and a compound of formula KR^f_3 , a catalyst comprising the salt, and a polymerization process using the catalyst, are all deemed to be novel since those claims all share the same novel feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
